**As a hardware supplier, Compolytics also provides a one-stop solution for essential ScanCorder-related accessories and consumables to help you maximise the potential of your ScanCorder sensors.**

## PTFE Calibration Pad

### Specification

- ✔ Polytetrafluoroethylene (PTFE) calibration pad for spectral sensor applications.
- ✔ Stable, reproducible reference values ensured by PTFE's exceptional optical neutrality, chemical resistance, and long-term durability – unmatched by low-cost alternatives.
- ✔ Reflection (nominal): 90% (other values available on request).
- ✔ Size (approx.): 50 × 50 mm.
- ✔ Supplied with digital calibration certificate on USB stick.
- ✔ Protective black case with magnetic closure – doubles as a low-reflectance background and for dark-current calibration.

### Why PTFE?

- ✔ Universal use – suitable for VNIR and SWIR sensor systems.
- ✔ Easy handling – retains reference performance under normal use; clean gently (no abrasives) when required.
- ✔ Traceable quality – produced and certified under controlled conditions.
